

Case Study

Judy Caesley, Dental Hygiene and Therapy Tutor and Ikigai Educator, Bristol

A patient had tried all products to reduce his sensitivity to sugary foods, hot and cold stimuli to no avail, and this was making his life miserable. Neither the Sensodyne range or Colgate worked for him.

I gave him a sample tube of BioMin F and asked him to keep a diary, with instructions to brush, swish and spit; don't rinse. Within two days the sensitivity symptoms had started to subside significantly. He did not report back straightaway as he was somewhat surprised and concerned that his new-found comfort would not last! Two and a half weeks on he is a convert.

After having years of discomfort, pain and avoidance, he is now comfortable.

Reported to Moira Crawford, on behalf of BioMin Technologies Limited.
